REPLACED BY
ART 34 AMDTCLAIMS:

1. A seal for a valve for use in a pharmaceutical dispensing device, which seal is formed from an elastomeric composition comprising:
- 5 (a) an isobutylene polymer or co-polymer thereof;
- (b) a cross-linking agent for the isobutylene polymer or co-polymer thereof; and
- (c) an accelerator for the cross-linking agent,
- 10 wherein the accelerator includes a polysulphide compound derived from a substituted dithiocarbonic acid or derivative thereof.
2. A seal as claimed in claim 1, wherein the elastomeric composition comprises one or more of
- 15 polyisobutylene, polybutene, butyl rubber, halogenated butyl rubber, including derivatives thereof.
3. A seal as claimed in claim 2, wherein the elastomeric composition comprises bromobutyl rubber and/or chlorobutyl rubber, including derivatives thereof.
- 20 4. A seal as claimed in any one of the preceding claims, wherein the elastomeric composition comprises a blend of an isobutylene polymer or co-polymer thereof and a chlorine-substituted diene polymer or co-polymer thereof.
- 25 5. A seal for a valve for use in a pharmaceutical dispensing device, which seal is formed from an elastomeric composition comprising:
- (a) a chlorine-substituted diene polymer or co-polymer thereof;
- 30 (b) a cross-linking agent for the chlorine-substituted diene polymer or co-polymer thereof; and
- 35

ART 34 AMDT**

- 32 -

(c) an accelerator for the cross-linking agent, wherein the accelerator includes a polysulphide compound derived from a substituted dithiocarbonic acid or derivative thereof.

5

6. A seal as claimed in claim 5, wherein the elastomeric composition comprises a chlorine-substituted butadiene polymer.

10

7. A seal as claimed in claim 6, wherein the elastomeric composition comprises 2-chlorobuta-1,3-diene.

15

8. A seal as claimed in any one of the preceding claims, wherein the cross-linking agent comprises sulphur or a sulphur-donating compound.

20

9. A seal as claimed in any one of the preceding claims, wherein said polysulphide compound is derived from a substituted xanthic acid or derivative thereof.

25

10. A seal as claimed in any one of the preceding claims, wherein the substituted group in said polysulphide compound comprises or consists of an isopropyl group.

30

11. A seal as claimed in any one of the preceding claims, wherein said polysulphide compound comprises or consists of diisopropyl xanthogen polysulphide.

35

12. A seal as claimed in any one of the preceding claims, wherein said polysulphide compound comprises three or more bridging sulphur atoms.

13. A seal as claimed in any one of the preceding claims, wherein said polysulphide compound is substantially free from nitrogen, phosphorus and

ART 34 AMDT**

metallic elements.

14. A seal as claimed in any one of the preceding claims, wherein the elastomeric composition comprises up to 3 wt.% of the accelerator based on the total weight of the accelerator and polymer in the composition.

15. A seal as claimed in claim 14, wherein the elastomeric composition comprises up to 1.5 wt.% of the accelerator based on the total weight of the accelerator and polymer in the composition.

16. A seal as claimed in any one of the preceding claims, wherein the weight ratio of the accelerator to the cross-linking agent in the elastomeric composition is in the range of from 1:1 to 3:1.

17. A seal as claimed in any one of the preceding claims, wherein the seal further includes a mineral filler.

18. A seal as claimed in claim 17, wherein the mineral filler is selected from one or more of magnesium silicate, aluminium silicate, silica, titanium oxide, zinc oxide, calcium carbonate, magnesium oxide magnesium carbonate, magnesium aluminium silicate, aluminium hydroxide, talc, kaolin, clay and amino silane coated clay.

19. A seal as claimed in any one of the preceding claims, wherein the seal further includes a process aid, preferably a low molecular weight polyethylene.

20. A seal as claimed in any one of the preceding claims, further comprising one or more of a

reinforcement agent, a plasticizer, a binder, a stabilizer, a retarder, a bonding agents, an antioxidant, a lubricant, a pigment, a wax, a resin, an antiozonants, a secondary accelerator or an activator.

21. A valve for use in a pharmaceutical dispensing device having a seal as defined in any one of claims 1 to 20.

22. A pharmaceutical dispensing device having a valve as claimed in claim 21.

23. A pharmaceutical dispensing device as claimed in claim 22 which is a pharmaceutical metered dose aerosol inhaler device.

24. A dispensing apparatus for dispensing pressurised fluid comprising a valve body defining a chamber, a valve member extending movably through the chamber and through at least one annular seal co-operating with the valve member and the body to regulate the discharge of fluid, wherein the or at least one of the seals is as defined in any one of claims 1 to 20.

25. A dispensing apparatus which comprises a pressurised dispensing container having a valve body provided with two annular valve seals through which a valve member is axially slidable, said seals being disposed at inlet and outlet apertures of a valve chamber so that the valve functions as a metering valve, wherein at least one of the annular valve seals is as defined in any one of claims 1 to 20.

26. A dispensing apparatus as claimed in claim 24 or claim 25, comprising a pressurised dispensing

**REPLACED BY
ART 34 AMDT**

container operatively connected to the valve body and containing the fluid to be dispensed and a hydrofluorocarbon propellant comprising propellant type 134a or 227.

5

27. A dispensing apparatus as claimed in any one of claims 24 to 26, wherein the fluid to be dispensed comprises a liquid or particulate product as a solution or suspension in a carrier liquid comprising alcohol.

10

28. A dispensing apparatus as claimed in claim 27, wherein the alcohol comprises ethanol.

15

29. A seal for a valve for use in a pharmaceutical dispensing device, which seal comprises a vulcanisate of an isobutylene polymer or co-polymer thereof, a cross-linking agent for the isobutylene polymer or co-polymer thereof, and an accelerator for the cross-linking agent, wherein the accelerator includes a polysulphide compound derived from a substituted dithiocarbonic acid or derivative thereof.

20

30. A seal for a valve for use in a pharmaceutical dispensing device, which seal comprises a vulcanisate of a chlorine-substituted diene polymer or co-polymer thereof, a cross-linking agent for the chlorine-substituted diene polymer or co-polymer thereof, and an accelerator for the cross-linking agent, wherein the accelerator includes a polysulphide compound derived from a substituted dithiocarbonic acid or derivative thereof.

25

30

31. A process for the preparation of a seal for a valve for used in a pharmaceutical dispensing device, the process comprising:

35

(i) forming a composition comprising a mixture of

**REPLACED BY
ART 34 AMDT**

an isobutylene polymer or co-polymer thereof, a cross-linking agent for the isobutylene polymer or co-polymer thereof, and an accelerator for the cross-linking agent, wherein the accelerator includes a polysulphide compound derived from a substituted dithiocarbonic acid or derivative thereof;

(ii) initiating a cross-linking reaction in the mixture to form a cross-linked elastomeric composition; and

(iii) either before or after (ii) forming the composition into a seal.

32. A process for the preparation of a seal for a valve for use in a pharmaceutical dispensing device, the process comprising:

(i) forming a composition comprising a mixture of a chlorine-substituted diene polymer or co-polymer thereof, a cross-linking agent for the chlorine-substituted diene polymer or co-polymer thereof, and an accelerator for the cross-linking agent, wherein the accelerator includes a polysulphide compound derived from a substituted dithiocarbonic acid or derivative thereof;

(ii) initiating a cross-linking reaction in the mixture to form a cross-linked elastomeric composition; and

(iii) either before or after (ii) forming the composition into a seal.

33. A process as claimed in claim 31 or claim 32, wherein the step of forming the composition into a seal involves one or more forming techniques selected from compression moulding, injection moulding and extrusion.

34. A process as claimed in any one of claims 31 to 33, wherein the process also involves washing the

**REPLACED BY
ART 34 AMDT**

seals.

35. A process as claimed in any one of claims 31
to 34, wherein the seals are immersed in an aqueous
5 chlorinated solution.

36. A process as claimed in claim 35, wherein the
aqueous chlorinated solution comprises water and HOCl.

10 37. A process as claimed in any one of claims 31
to 36, wherein the seals are immersed in a solution
comprising water and sodium dichloroisocyanurate
(NaDCC).
